

- 1) Image which we are taking at time of user creation that image will go as banner of user. So when user login his banner there should be his banner. fix height and width of banner whatever user upload it will resize to our limit.
So that After login every school have their own banner of school in the login page.
- 2) In SMS report there should be slight changes in the view as it shows now, it should be current message status, date, time, class and roll wise, should be an option of pending messages.
- 3) Character count script in every text box of message.
- 4) There should be a confirmation before sending absentee messages as it can create a serious issue.
- 5) Cell & border should be viewed in the print preview option also.
- 6) There should be an option of active/de-active option of the student, because of the student take TC in the mid session in the school.
- 7) In add/edit option if new student added it should automatically arrange in the last roll no.
- 8) In attendance report view roll number of the student, place "-" mark instead of "H" mark.
- 9) Edit user form is mismanaged.
- 10) Account manager details is for every user so when we add account manager there should be option to select user. so that account manager details will show for that user only when user logged in.
- 11) Dashboard of user:
 - Total SMS sent today
 - Overall sent sms
 - Balance SMS
 - Total Active Student
 - Total Inactive students
 - Today No of student Absent
- 12) Send sms to class in send sms section
- 13) In manage student there should be class filter option also. And should have column same like send sms to student.
- 14) Manage teacher all column should be same as send sms to teacher.
- 15) Manage attendance template there should be only 2 option present template, absent template only
- 16) Take attendance page: sms for : absent, present, both (drop down)
- 17) Print option in attendance register
- 18) Tiny url is not working in attachment properly.
